

## **Initial Assessment Prior to Learning**

ATL will carry out a skill scan of each candidate to determine the level and qualification most suited to that candidate. The skill scan will comprise of a discussion and mapping their duties to the relevant standards. Once satisfied that the candidate is on the correct course and level, a Maths and English diagnostic test is carried out on line, using BKSb live. This shows the level that the candidate is currently at, and what areas need to be worked on to achieve the functional skill aspect of the framework.

Each candidate has a login set up on BKSb live and they can access the tutorials via the internet, working on the learning plan generated by the diagnostics. The ATL tutor will support the candidate through one to one sessions to the point where they are ready to sit the exams.
